

The closed safety system of Zodiac offers a calming protection and ensures an economical work in laboratory. The new, improved air valve combines valve and filter functions. As usual, ventilation occurs during removal; harmful solvent vapors are blocked. At the same time, the valve membrane absorbs dust and contaminant particles from the incoming air. The valve also fits your existing Velox Safety Caps without any technical modification.

Advantages:

- **No more harmful vapors**
Thanks to the integrated air valve.
- **No eluent contamination**
Receptacles remain securely closed so the results of your analysis stay correct.
- **No tube slippage**
No accidental intake of air into the HPLC system.
No interruption of analytical and work processes due to air pockets in the tube.
- **Easy container changes**
Thanks to a freely-rotatable cap, even with tubes installed. Without twisting or "tangled tubes".
- **Confidence during audits**
With Velox Solvent Safety Cap you pass quality and safety inspections with confidence.

Air Valve:

- The new, improved air valve combines valve and filter functions. As usual, ventilation occurs during removal.
- Harmful solvent vapours are blocked. At the same time, the valve membrane absorbs dust and contaminant particles from the incoming air.
- The valve also fits your existing Velox Safety Caps without any technical modification.

Sign-in the installation date:

- **Never miss a chance again**
The air valve with the part number is delivered with a change-advice-label. Just sign-in the current date at the installation and you are safe in observing the service life.
